

Prolink: Instant Insights. Better Decisions.

Automate your measurement data. Eliminate errors.
Gain control.

What is Prolink?

Prolink automates data collection from your measurement systems—providing real-time access to all component characteristics across your plant.

Automation

No more manual entry. Prolink captures your data automatically and instantly.

Plug-and-Play Integrations

Connects to CMMs, calipers, VMMs, micrometers—anything with an output.

Visibility & Control

Live dashboards. Clear reports. Full oversight from a single site or across global operations.

Seamless Fit

Easily integrates with your existing software stack—statistics, ballooning, or database tools—for standardized reporting and faster adoption.

Eliminate errors

Save operator time

Standardize reporting

Enable proactive decisions

Monitor every characteristic

Scale across sites globally

Your measurement data just got smarter.
